Objective

To secure an opportunity in a reputed organization where I can apply my knowledge of programming (C, C++, Python, Java), web development (MERN stack), and database management (MySQL, MongoDB), while enhancing my expertise in problem-solving, cybersecurity, and collaborative teamwork to contribute to organizational growth. I am eager to learn emerging technologies, adapt quickly to new environments, and take on challenging responsibilities. With a strong foundation in computer science concepts and a passion for innovation, I aim to deliver efficient solutions. My goal is to grow as a professional while adding value to both the team and the organization

Education

Polytechnic Solapur

Diploma in Engineering Percentage: *November 2025 - May 2027*

S.R Girls High School Sevasadan Solapur, India

SSC - Percentage: 84.80% *June 2019 - May 2024*

Skills Summary

- **Languages**: C++, C, JavaScript, JAVA, Python, HTML, CSS
- **Tools**: Canva, Windows, Linux, GIT, Github, VsCode, Android Studio,
- **Databases**: MySQL, MongoDB, Oracle, Xampp
- **Other Skills**: DBMS, DSA, OOP

Projects

Library Management System | Java, AWT, Swing, JDBC, MySQL

- The Library Management System is a Java-based desktop application developed to automate and simplify day-to-day library operations. This system is designed to handle key tasks such as managing books, tracking issued/returned books, handling student/user records, and monitoring library activity efficiently.
- The project provides an interactive GUI using AWT and Swing components, offering users a smooth experience. The backend is managed through JDBC, ensuring secure and efficient data manipulation with the database.

Website Vulnerability Scanner | Python, Requests, BeautifulSoup, Nmap, Socket, OWASP concepts

- Developed a Python-based tool to scan websites for common vulnerabilities like open ports, outdated server software, insecure HTTP headers, and SQL injection points using libraries like requests, nmap, and BeautifulSoup.
- Helped identify security loopholes in web applications, making it a valuable project to showcase basic ethical hacking skills and knowledge of cybersecurity practices.

Achievement

- **Education / Learning**
- Completed basic **Python programming** course
- Learned **C programming fundamentals**
- Created first **HTML portfolio website**
- Completed **Database Management System mini project**
- Learned **Canva UI design basics**
- **Projects**
- Made **Student Management System**
- Made **Online Food Delivery Website Design**
- Created **Portfolio Website**
- Made **Traffic Light Control System using 8086**
